

Personal Portfolio Theme

Technical Documentation

Introduction

This theme provides specialized, responsive web layouts engineered for haute couture fashion designers, bespoke bridal stylists, luxury atelier studios, and creative directors. It delivers dedicated studio and VIP client portals, an interactive 3D hero canvas, flip lookbook cards, 3D award book open animations, video showcase modals, a filterable collections grid, and secure multi-role authentication systems.

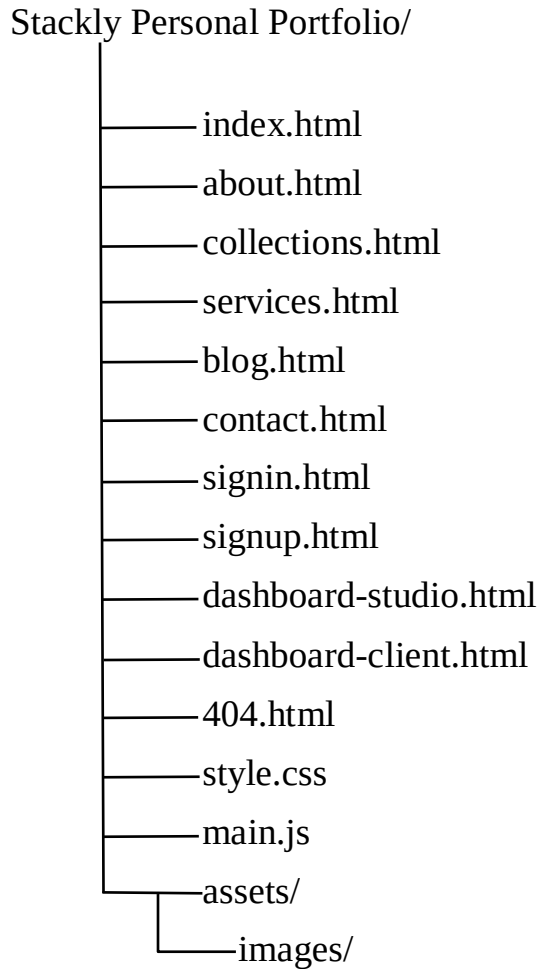

Themes Features

- Fully Responsive HTML5 & Bootstrap 5.3 Framework Architecture
- Pure Frontend Clean Structural Source Code
- Fashion Designer Studio Suite & VIP Client Portal Dashboards
- Secure Multi-Role Sign-In & Sign-Up Account Flows (Client / Designer)
- Luxury Preloader with Real-Time Progress Bar & Percentage Counter
- Interactive High-Precision Custom Orbital Aura Cursor
- Swiper Lookbook Carousel & 3D Interactive Flip Cards
- Filterable Silhouette Lookbook Grid with Modal Viewers
- Interactive Runway & Revenue Growth Canvas Charts
- 6-Step 3D Craftsmanship Method Flip Cards & Masterclass Cards
- Client Fitting Booking System with Custom Date Picker & Dropdowns
- Clean, Completely Organized, and Comprehensively Commented Code

Technologies Used

Technology	Description
HTML5	Fashion Portfolio, Lookbook & Studio Layouts
CSS3	Charcoal Dark, Platinum White & Couture Gold Styling
JavaScript	Swiper Sliders, 3D Canvas Mesh & Chart Engine
Inline SVG	FontAwesome 6 Icons & Haute Couture Badges

Folder Structure

Installation Guide

Local Setup

1. Download the ZIP package.
2. Extract the ZIP file.
3. Open the project folder.
4. Run index.html directly in the browser.

Hosting Setup

1. Upload all HTML Themes files to the hosting server.
2. Configure the root directory settings.
3. Ensure all assets paths are linked properly.
4. Launch the live website URL.

Main HTML Pages

The core interface pages included in this theme configuration are tabulated below with their brief descriptions:

Page File Name	Description
index.html	Home & Couture Runway Showcase
about.html	Designer Biography & Artisan Guild
collections.html	Lookbook Archive & Editorial Critiques
services.html	Atelier Services & 6-Step Craft Method
blog.html	Fashion Journal & Runway Dispatches
contact.html	Studio Salons & Fitting Booking Desk
signin.html	Multi-Role Atelier Sign In Portal
signup.html	VIP Client & Designer Registration
dashboard-studio.html	Fashion Designer Studio Management Suite
dashboard-client.html	VIP Patron Commission & Fitting Portal
404.html	Sartorial Error Boundary Route

Detailed Page Breakdown

index.html

The primary couture landing layout. Displays an interactive 3D hero canvas, live runway marquee ticker, designer biography pillars, telemetry metric counters, backstage video showcase, swiper collection flip cards, master craftsmanship metrics, scroll-based expanding showcase, and client testimonials.

about.html

Designer Aria Vance's heritage and milestone showcase. Highlights master couture certifications, an artisan guild overview, a 4-stage interactive photo stack deck with swipe mechanics, 6 core operating tenets flip cards, executive partner torchlight cards, regional desk networks, and 3D opening award book animations.

`collections.html`

The seasonal runway lookbook library. Features category filter buttons (Haute Couture, Avant-Garde, Bridal Elegance, Ready-to-Wear, 3D Digital Couture), quick silhouette view modals, a 4-stage runway odyssey progression, and international press critique dispatches from Vogue Paris, Harper's Bazaar, and Elle International.

`services.html`

Atelier design services and pricing structure. Structures bespoke bridal, runway direction, and 3D garment prototyping cards, a 6-step craftsmanship method with two-sided 3D flip specifications, 3 commission pricing tiers, a 3-stage private consultation protocol, and expandable FAQ accordions.

`blog.html`

The fashion journal and editorial dispatches hub. Features a highlighted Milan backstage essay, curated articles grid, backstage runway video diary with 4K playback, polaroid archives, and 3 interactive masterclass cards with hover/tap overlays.

`contact.html`

Salem flagship studio coordination gateway. Contains a flagship salon info card with direct WhatsApp links, a custom fitting booking form with custom dropdowns, a custom calendar date picker, Google Maps integration, 3 flagship fitting suites, and international trunk show tour cards.

`signin.html`

Dual-role authenticated entry portal. Features interactive role tabs (VIP Client vs Fashion Designer), floating label inputs with icon indicators, password visibility toggles, social login shortcuts, and automatic role-based dashboard redirects.

`signup.html`

Atelier patron registration portal. Provides dual-role account options, comprehensive client-side form validation (name, phone, email, bespoke aesthetic interest, city, password matching, and charter agreement checkbox), and local storage credential caching.

`dashboard-studio.html`

Lead Fashion Designer operational management suite. Tracks active commission KPIs, live salon fitting appointments, garment pipeline stage meters, Ahimsa silk fabric inventory, patron correspondence inbox, and Chart.js canvas analytics charts.

`dashboard-client.html`

VIP Patron self-service commission workspace. Houses an active bespoke ensemble status tracker, a 4-stage production lifecycle meter, upcoming salon/virtual fitting schedules, confidential 3D biometric measurement profiles, commission invoice ledgers, and a direct concierge messaging console.

404.html

Sartorial error boundary screen. Features an architectural grid background, gradient 404 typography, couture notice context messaging, and direct navigation links to return to the homepage or collections archive.

CSS Customization

- Global design variables are declared in the `:root` selector within `style.css`.
- Update `--gold-primary` (`#c28800`), `--gold-light` (`#d97706`), and `--gold-dark` (`#92400e`) to modify the signature couture palette.
- Modify `--bg-body` (`#f8fafc`), `--text-dark` (`#0f172a`), and `--border-card` (`#e2e8f0`) to adjust structural backgrounds and typography contrast.
- Typography hierarchies map across `--font-heading` (Plus Jakarta Sans), `--font-body` (Outfit), and `--font-mono` (Space Grotesk).

Color Palette Specifications

The global styling system declares professional variables within the root layout layer to ensure structural brand alignment:

- **Couture Gold (`--gold-primary` / `#c28800`):** Primary accent tone applied to buttons, active badges, progress bars, links, and border highlights.
- **Deep Architectural Slate (`--text-dark` / `#0f172a`):** Primary typography color for headings, dark tags, and contrast components.
- **Pure Clean White (`--bg-primary` / `#ffffff`):** Card backdrops, table surfaces, input containers, and clean layout surfaces.
- **Slate Grey Gradient (`#1e2430` to `#252d3a`):** Specialized dark sections such as the facts counter, craftsmanship method, and booking CTA.
- **Soft Amber Accent (`#f5b800`):** Applied to review stars, metric highlights, preloader accents, and secondary indicators.

JavaScript Files

main.js

Coordinates all DOM initializations, interactive component logic, and modal handlers. Manages the preloader timeline and progress animation (`initPreloader`), custom orbital aura cursor (`initCustomCursor`), magnetic video play button tracking, 3D hero canvas silk mesh simulation, numerical counters, Swiper lookbook carousel, collection category filtering, video and quick-view modals, multi-role authentication with local storage session caching, studio and client dashboard tab switching with Chart.js analytics, 3D flip card interactions, scroll expand showcase, custom dropdown containers, and appointment form validation.

Image Replacement Guide

- Update the logo by replacing assets/logo.webp.
- Ensure all custom replacement graphics match the layout dimensions to preserve grid structure.

Responsive Design

The theme framework is fully responsive and supports:

- Desktop Framework Systems
- Laptop Dimensions
- Tablet Presentation Adaptation Layer
- Mobile Media Configurations

Fashion Designer Studio Dashboard

The theme provides an operational suite for fashion designers and studio directors:

- **Studio Telemetry KPI Cards:** Tracks active commissions (28), salon fittings (14), stitch hours logged (1,420), and Ahimsa silk roll inventory (84).
- **Salon Fitting Appointments Table:** Live queue monitoring patron names, commission types, fitting stages, and confirmed time slots.
- **Garment Production Pipeline:** 4-stage progression bars tracking silhouette sketching, muslin toile, bullion embroidery, and final delivery.
- **Fabric Inventory Reserve:** Sourcing ledger tracking raw Ahimsa silk, 24K bullion threads, and cashmere wool balances.
- **Runway Analytics Engine:** Chart.js canvas charts visualizing seasonal revenue bars, category breakdown doughnuts, and international fashion capital requests.
- **Dashboard file route:** dashboard-studio.html

VIP Client Portal Dashboard

The theme provides an individual workspace for bespoke couture patrons:

- **Active Commission Monitor:** Visual progress tracker for royal Ahimsa silk bridal lehengas (#SHC-2026-08) and obsidian velvet gala capes (#SHC-2026-11).

- **Production Lifecycle Stepper:** 4-stage status badges showing silhouette sketch, muslin toile, hand zardozi, and final white glove delivery.
- **Salon Fitting Schedule:** Upcoming appointment calendar tracking Salem studio fittings and virtual 3D avatar sessions.
- **3D Biometric Profile:** Confidential silhouette measurement cards storing bust, natural waist, hip, shoulder, and gown length dimensions.
- **Direct Concierge Chat:** Interactive real-time messaging console for direct communication between patrons and lead designer Aria Vance.
- **Dashboard file route:** dashboard-client.html

Contact Form Integration

The current contact form is UI only. To make it functional, connect:

- Node.js API Endpoint
- Firebase Firestore Integration
- PHP Mail Configuration

Performance Optimization Tips

- All lookbook images, couture banners, and artisan portraits are compressed in WebP format to minimize payload sizes.
- Video assets (hero.mp4) are initialized with preload="metadata" to conserve initial page load bandwidth.
- Scroll animations and numerical counters use the IntersectionObserver API to optimize browser render performance.

SEO Optimization

- Semantic structure tags (<header>, <main>, <section>, <article>, <aside>, <footer>) ensure clean layout hierarchy.
- Targeted couture keywords (Haute Couture, Bespoke Bridal, Ahimsa Silk, Milan Runway) are incorporated across meta descriptions and heading structures.
- Comprehensive alternative image tags are implemented across all media assets (alt="Custom Bridal & Gala Couture Atelier").

Credits

Built completely with HTML5, Bootstrap 5.3, CSS3, Google Fonts (Outfit, Plus Jakarta Sans, Space Grotesk), FontAwesome Icons, Swiper.js, Chart.js, HTML5 Canvas API, and custom vanilla JavaScript logic (main.js).

Support Information

If you face any issues while editing or customizing the theme templates:

- Check custom dropdown wrapper markup carefully (maintain .custom-dropdown-container, .custom-dropdown-trigger, and .custom-dropdown-menu structure).
- Verify asset paths and directory routes (e.g., assets/ relative paths for WebP images and video assets).
- Review browser developer console error logs for script path interruptions or CSS custom property conflicts.
